

Powerful *yet* precise

The supreme 541 Sedan marks new heights in the yacht field with its exquisite three-stateroom, two-head layout, and six-foot five-inch cabin bedroom, bringing ultimate onboard comfort and enjoyment.

The 541 is not only a piece of good news for the onboard guests, but it also makes a captain's dream come true with its strong and professional system. The sedan is the first Meridian Yacht to offer the powerful Zeus system as its standard propulsion package, which makes the control more accurate and nimble comparing to other yachts of its size. Besides that, the 541 is also the first bridge boat on the market to offer the option of Zeus drives mated to twin 715-horsepower QSM-11 engines while running perfectly on the standard twin 600-horsepower QSC8.3 power plants.

CONVIVIAL PARTIES

The 541 is fully-equipped with ranges of features and provides wonderful recreational activities. The flybridge, for example, is already a social hub. The cockpit is connected to the galley, so you can chat while cooking or enjoy movies with friends in the lavish salon.

Moreover, you won't miss water activities on the 541, as it acts as an excellent center for all cruising fun, featuring the optional hydraulic swim platform to lower tenders, PWCs or your friends into the water.

For enquiries, please call 2900 2222 or visit www.kingswaymarine.com for more details.
