

Audacious Voyage

For the sporty holidaymakers who yearn for a perfect getaway under the bright-lit sky, Custom Line 100' is going to be the new must-have.

Boasting a spacious interior, the 124', 112' NEXT, and 97' of the Custom Line 100' by Ferretti allow more seating and sunbathing space.

"The project of the 100' was developed to satisfy the demands of those of our owners, including young owners, seeking a more sporty design without, however, foregoing the functional features and more spacious areas of a wide bodied yacht," said Marco Segato, Custom Line Brand Manager.

The two large, open view windows on the lower deck and the one built into the starboard towards the bow,

allow more natural light.

Use of continuous glazing, extending the stern of the main deck around to the helm station, also contributes to the lightweight feature of the vessel.

For those who enjoy on-board entertainment, Custom Line 100' can also exceed their expectations. The introduction of the wider body near the bow area in the master cabin makes the line ideal for festive parties and private gatherings on the serene ocean.
